EDUCATION

Queens College, City University of New York

Spring 2026

Bachelor of Arts in Computer Science

Scholarships: APIA Scholar, Freda Stern Johnson Scholar

SKILLS

Languages & Frameworks: Python, JavaScript, React, Express, Java, Spring Boot

Data & Tools: MySQL, Firebase, Tableau, Power BI, Pandas, AWS, Docker, .NET, Git

PROFESSIONAL EXPERIENCE

Independent Web Developer

Sept. 2025 – Present

- Designed, developed, and deployed 10+ custom web applications for small businesses and individual clients, managing the full software development lifecycle from requirements gathering through deployment and ongoing maintenance
- Configured secure Stripe payment workflows supporting one-time and recurring transactions, processing **\$6,500+ in payments** with automated confirmations, invoicing, and transaction tracking
- Collaborated directly with clients to build onboarding, content delivery, and payment systems across **10+ projects totaling \$12,000+ in client work**

Blackstone Launch Pad | Software Engineer Intern

June 2025 – Aug. 2025

- Redesigned signup and contact workflows across Instagram, Facebook, and WhatsApp using React, HTML/CSS, Vite, and webhook integrations, increasing subscription sign-ups by **70% across 200+ prospective customers** over three months
- Built automated CRM and lead qualification workflows managing **1,000+ customer leads**, improving response time by **40%**, follow-up rates by **10%**, and increasing SMB subscribers by **200%**
- Created a custom analytics dashboard tracking **1,000+ webhook interactions**, user engagement, and conversion behavior, providing insights used to guide product and retention improvements

Everest Associates | Software Engineer Intern

July 2024 – Sept. 2024

- Developed Python-based data pipelines using Pandas, SQL, and CSV ingestion to ingest, clean, and validate 1,000 monthly financial and tax records, enforcing consistency and null checks to support high-accuracy tax filing and leadership reporting
- Automated manual data entry by 30% by integrating Google Vision OCR and Excel-based workflows, reducing reconciliation effort and surfacing data quality issues earlier in the monthly close process
- Built **15+ interactive Tableau dashboards** tracking revenue, expenses, and spending trends with dynamic filters, enabling leadership to monitor weekly financial performance and identify reporting anomalies

PROJECTS

[Health Plan Comparison](#) | Java | Spring Boot | Spring Data JPA | H2 | Maven | JUnit | Mockito

- Built a full-stack Health Plan Comparison API using Java, Spring Boot, Spring Data JPA, and H2, with endpoints for listing, filtering, and comparing NY marketplace-style plans
- Implemented SQL-backed analytics to return plan counts and average premiums by metal tier, and seeded realistic mock 2024 NY plan data for local testing and demos
- Developed a lightweight HTML/CSS/JavaScript frontend dashboard and wrote JUnit 5 + Mockito unit tests to validate service-layer business logic

LEADERSHIP EXPERIENCE

Basta | Fellow

Jan. 2026 – Present

- Selected for a competitive **10-week career development fellowship**, strengthening technical interview preparation, professional communication, networking, and career readiness

ISACA Cyber Security Club | Member

Sept. 2024 – May 2026

- Participated in cybersecurity workshops and industry talks covering application security, cloud security, emerging threats, and industry practices

Student Union | Event Manager

Sept. 2024 – May 2026

- Coordinated logistics for **10 campus-wide events serving 500+ students**, partnering with **5 campus organizations** to deliver successful programming and maximize student engagement

Code for All QC | Event Manager

Sept. 2024 – May 2026

- Organized **12+ technical workshops and hackathon events**, coordinating speakers and external organizations to support **300+ student participants** through hands-on software development and networking opportunities
